The 5-Year Impact Factor is the average number of times articles from a journal published in the past five years have been cited in the JCR year. For journals in subjects where citation activity continues to rise through several years, this metric allows more of their total citation activity to be included in a critical performance metric.

### **Comparative Medicine and JAALAS Impact Factors- 2011**

A journal's impact factor is a measure of the frequency with which the 'average article' in a journal has been cited during a particular year. Specifically, the impact factor for year y is calculated by dividing (a) the total number of citations during year y to articles that appeared in the journal in years y -1 and y -2 by (b) the total ...
