Astrology and astronomy were archaically treated together (Latin: astrologia), and were only gradually separated in Western 17th century philosophy (the " Age of Reason ") with the rejection of astrology. During the later part of the medieval period, astronomy was treated as the foundation upon which astrology could

Astronomy is the scientific study of the stars, planets, and galaxies, and their motions. Astrophysics uses principles and laws of physics to explain how stars, planets, and galaxies form and function. Astrology is a non-scientific form of entertainment that draws connections between human behavior and the alignment of the stars and planets.
