Just like that of a manual transmission, the automatic transmission's primary job is to allow the engine to operate in its narrow range of speeds while providing a wide range of output speeds.. Without a transmission, cars would be limited to one gear ratio, and that ratio would have to be selected to allow the car to travel at the desired top speed.. If you wanted a top speed of 80 mph, then ...

A "transaxle" is a combination of a "transmission" and an "axle." An automatic transaxle starts out as a normal automatic transmission, which bolts to the engine's flywheel via a torque converter and a flexplate. Then there's the transmission itself, which houses all the gears and gear-changing mechanisms.
