For examples, anxiety, pain, and fatigue are all symptoms. In contrast, a bloody nose is a sign of injured blood vessels in the nose that can be detected by a doctor, a nurse, or another observer. Health-care professionals use symptoms and signs as clues that can help determine the most likely diagnosis when illness is present.

Read PDF

Symptom To

Diagnosis An

creating Symptom to

Diagnosis was to  
develop an interesting,  
practical, and

informative approach  
to teaching the

diagnostic process in  
internal medicine.

Interesting, because  
real patient cases are  
integrated within each  
chapter,

complementing what  
can otherwise be dry  
and soporific.

...  
Using an online  
symptom checker is  
simple. For instance,  
you might be a 45 year  
old woman from the UK  
who is currently  
experiencing  
headache, a fever and  
a sore throat. Inputting  
this information into  
the symptom checker  
will give you some  
likely 'common'
