Little-Known Trick Will Disable Engine Auto-Stop-Start ...

For the vast majority of people, cranking your car involves getting the key out, sliding it into the ignition, and turning it to the "run" position. However, if you have a push-button start system, then you don't have to do that. You just get inside and push the button labeled start/stop, and the engine roars to life.

How Does a Push-Button Start Work? | YourMechanic Advice

On a manual transmission vehicle, stop-start is activated as follows: Stop car and press clutch - move gear lever to neutral - release clutch - then the engine stops. The engine will not stop if the car is moving, even if the aforementioned steps are followed (this is not true for all cars).
