### Erlang And Otp In Action

Erlang and OTP in Action teaches you the concepts of concurrent programming and the use of Erlang's message-passing model. It walks you through progressively more interesting examples, building systems in Erlang and integrating them with C/C++, Java, and .NET applications, including SOA and web architectures.

### Manning | Erlang and OTP in Action

Erlang and OTP in Action teaches you to apply Erlang's message passing model for concurrent programming--a completely different way of tackling the problem of parallel programming from the more common multi-threaded approach. This book walks you through the practical considerations and steps of building systems in Erlang and integrating them with real-world C/C++, Java, and .NET applications.

Erlang/OTP is divided into a number of OTP applications. An application normally contains Erlang modules. Some OTP applications, such as the C interface `erl_interface`, are written in other languages and have no Erlang modules. On a Unix system you can view the manual pages from the commandline using.

By describing the use of Erlang and OTP together, the reader is somewhat insulated from some of the more theoretical sides of functional programming and can instead concentrate on getting the job done. If you are new to Erlang and functional programming then I would not recommend this book on its own.
