Online Library Java A Detailed Approach To Practical Coding Step By Step Java Book 2

Method 1: One obvious approach is to write our own sort() function using one of the standard algorithms. This solution requires rewriting the whole sorting code for different criterion like Roll No. and Name. Method 2: Using comparator interface- Comparator interface is used to order the objects of user-defined class. This interface is present in java.util package and contains 2 methods compare ...

Comparator Interface in Java with Examples - GeeksforGeeks

Java being one of the most popular programming languages provides extensive support to various functionalities like database, sockets, etc. One such functionality is File Handling in Java. File Handling is necessary to perform various tasks on a file, such as read, write, etc.
