Terrestrial biomes usually grade into each other without sharp boundaries. The area of intergradation, called the ecotone, may be narrow or wide. The species composition of any biome differs from location to location. Biomes are dynamic, and natural disturbance rather than stability tends to be the rule.

### Chapter 50 - An Introduction to Ecology and the Biosphere ...

All organisms are composed of one or more cells. New cells come from pre-existing cells; lifeforms today have descended in unbroken continuity from the first primitive cells that arose on earth more than 3.5 billion years ago. Hereditary information passes from parent cell to daughter cell.
